

Poydras Home *Reimagined*

ELEVATING OUR TRADITION OF CARE

THOUGHTFUL DESIGN & ELEVATED SAFETY

While retaining the charm of high ceilings and light-filled views of Uptown New Orleans, our new spaces will provide even greater convenience, accessibility, and luxury. This close-knit design within a larger community also naturally lends itself to health management, keeping our vulnerable populations safe and well. In Green House® Project homes nationwide, COVID exposure and infection were lower, confirming it as the best choice for our residents.

Poydras Home *Reimagined*.

For over 200 years Poydras Home has delivered compassionate care to all who have called it home. Now, we're proud to be elevating that tradition of care with Poydras Home Reimagined, a transformation that will make us the first community in Louisiana to incorporate The Green House® Project model of care.

Poydras Home *Reimagined*

implements best practices from extensive research over the past several years. In attending conferences and communities around the country, we concluded The Green House® Project model is by far the best in senior care. We designed Poydras Home Reimagined around its principles, which do away with any institutional, long-hallway nursing home atmosphere and empower residents as decision-makers, focusing on care in small group, family-style homes. This transition will further enhance Poydras Home's core value of devoting personal attention to every resident.

In addition to a smaller number of residents per house, every house has a dedicated team of Care Partners who knows each resident's health needs in depth. These certified nursing assistants are highly trained to assist with numerous tasks, making each day meaningful and bright. Each resident's interests and passions are engaged to keep them active throughout the day—a lifestyle that honors individual preference and personality as well as fostering deep connection with Care Partners.

TRADITION MEETS PROGRESS: NEW HOMES AT POYDRAS HOME

Poydras Home's campus will feature new buildings in which residents will have even more personalized care and interaction while experiencing the same freedoms they already know. The architecture firm of Eskew, Dumez, and Ripple will oversee Poydras Home Reimagined, ensuring all structural changes are both progressive and rooted in our aesthetic traditions.

Two new, three-story buildings linked by a majestic glass atrium will serve as the entryway for six homes, one on each floor of the new buildings. Each will feature a cluster of spacious private bedrooms with en suite

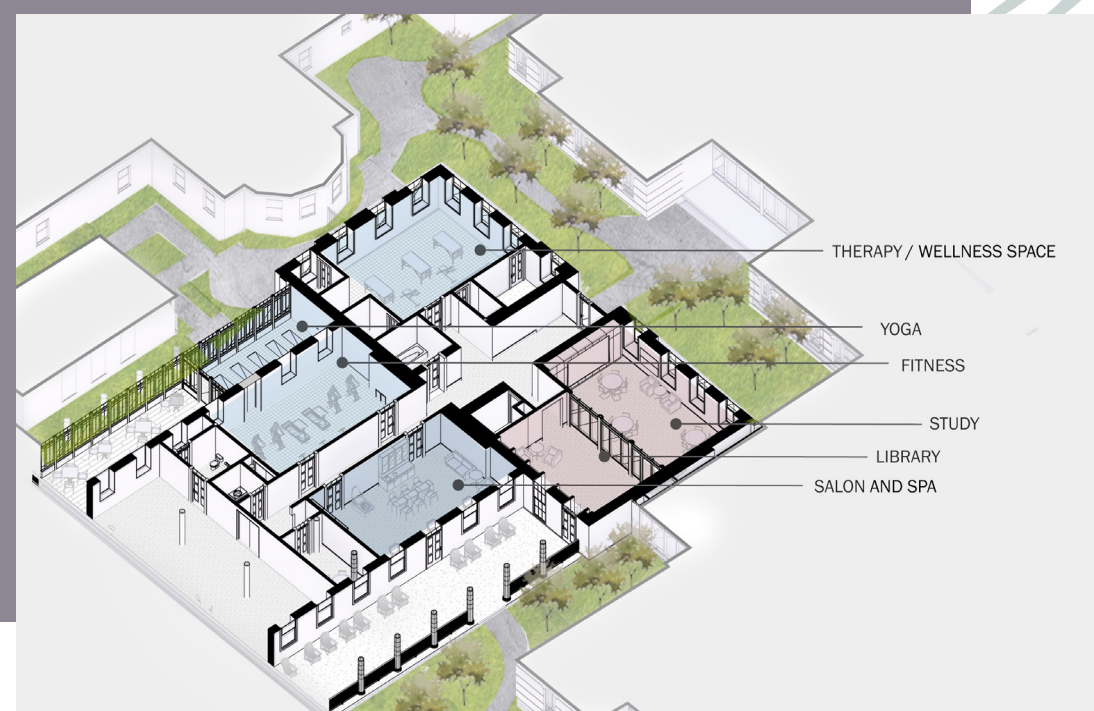

bathrooms, nestled around shared living rooms with comfortable seating and fireplaces, dining rooms, state-of-the-art kitchens where residents may participate in meal preparation, and additional balconies and patios to enjoy our beautiful grounds.

Poydras Home's Historic House will be transformed into the Center for Healthy Living, while retaining our popular 1857 Hall and Jefferson Avenue porch. In the Center for Healthy Living, residents will enjoy a yoga studio, therapy/wellness space, library, meditative space, expanded salon and spa, and a multipurpose space for additional programming and education.

Spacious living, open floor plans, and an amenities-packed Center for Healthy Living.
